Coventry Middle School – 330-644-2232
Coventry High School – 330-644-3004
What is new in nursing?

At each building, there will now be two clinic rooms.

The first will be for students who are well and need to go to the clinic for their daily medications, band aids, ice packs etc.

The second room is where students who are sick will go and wait until a parent comes and picks them up.
When should a student stay home?

A student should not come to school if they have a 100 degree or higher fever.

A student should not come to school if they are coughing and have lower respiratory symptoms.
Parents will be called to pick up a child who is sick.
When will a student be sent home from school?

- 100 degree fever or higher
- Coughing and signs of lower respiratory infections
- Student must be picked up within 30 minutes of the phone call.
- Clinic will be cleaned and sanitized after a student goes home.
- Student may return to school after all symptoms are cleared and/or a note from their physician. This may be up to 10 days in some cases.
How can parents help?

If you are unsure if you should send your child to school in the morning, then please keep them home and monitor them to see if they start feeling worse or better.

Keep the schools informed if anyone in your family has been positively diagnosed, or if your family has been exposed and will be self quarantined for 14 days.
Expectations

Parents
◎ Conduct a child wellness check, including temperature prior to sending students to school.
◎ Provide a clean mask for your child to wear, on a daily basis
◎ Ensure all contact information is up-to-date so we can contact you.

Students
◎ Use designated doors to enter and exit the office/clinic and use social distancing.
◎ Wearing a mask is required in the clinic (unless another health reason necessitates it can not be worn).
◎ Wearing a mask is required if a student has a fever at school.

Nurse
◎ A mask is required when working with a student.
◎ Ensure the workspace clean and sanitized.
◎ Quarantine students who are showing symptoms in the 2nd clinic area.
◎ Disinfect immediately following a student entering who exhibits symptoms
